

REDEPLOYABLE EV CHARGING

EXPEDITE YOUR EV ADOPTION

EV CHARGING SIMPLIFIED

Volt Vault™ is a patent-pending natural gas supplied, redeployable EV charger. Volt Vault's onsite power generation provides charging up to 175kW with two level 3 chargers or up to 16 level 2 chargers.

FLEXIBLE FUELING OPTIONS

We'll work with you to understand your fuel budget and emission goals—designing a Volt Vault configuration to get you there.

FUEL SOURCE

⚡ Onboard ⚡ Pipeline

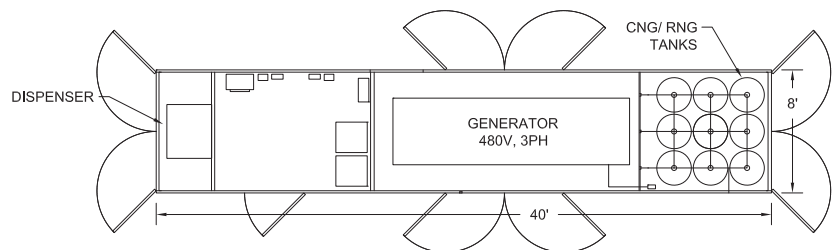

FUEL TYPE

- ⚡ Natural Gas
- ⚡ Renewable Natural Gas (RNG)
- ⚡ Blend RNG/Natural Gas

Volt Vault can provide a sub-zero carbon intensity profile.

Vertically integrated across the RNG supply chain, we'll source a blend of landfill or dairy gas from our project portfolio.

LEVEL 2 CHARGER

Up to 16 Chargers

LEVEL 3 CHARGER

Two Chargers

Seeking a completely off-grid solution? Integrate solar panels into your model to satisfy critical hotel-power needs such as climate control and lighting..

TIME TO PRESS THE EV CHARGING EASY BUTTON

We're here to make sure implementing Volt Vault is effortless. We'll take care of:

PRODUCT SELECTION

Assess duty cycle, miles driven, and operational needs to select the quantity of Volt Vault units and charging speed required.

FUELING

Evaluate your charging location and goals to determine the fuel type and source that will work best for you—including helping you work with utility partners.

DELIVERY

Assist with the permitting process so you're ready for day one. We'll also lead training and commissioning as well as provide ongoing maintenance support.

THE BENEFIT TO YOU

Eliminate Infrastructure Wait Time

Stop waiting for EV infrastructure build out and implement your electrification plan sooner.

Disconnect from the Grid

Since Volt Vault is not connected to the grid, you won't experience capacity constraints or outages that derail your operations.

Customize Fleet Deployment

Place it where you need it, when you need it—allowing you to easily add routes, increase fleet size, and expand to new locations.

Control Your EV Budget

Eliminate demand and time-of-use charges. Fueling costs are limited to the gas you use. Natural gas, compressed natural gas, and renewable natural gas are all fueling options with Volt Vault.
